

Cable Lubricant

A range of high quality lubricants for both the power and telecommunications sectors.

POWER – Pail size 20Ltr.

CL1 techlube H.D – developed for large power and also heavy telecommunications cable high cling factor enables it to remain evenly coated on large diameter cable allowing it to slip into ducts more easily than conventional lubricants.

TELECOMMUNICATIONS – Pail size 20Ltr.

LD1 Lubricant – Approved to BT specification MAT138C emulsion based silicone this product specifically formulated with added micro beads to reduce pulling friction by up to 70%

LD2 lubricant – Low cost version of the above. Generally the same as LD1 but without the micro beads.
