

Hydraulic Cable Cutters

This cutter is designed for cutting up to 76mm/3" diameter copper cables only and must not be used for other types of cable (and if damage occurs after use on cutting any cables not recommended then Rotrex will not be responsible for any claims or repair under the warranty).

Rotrex Winches' hydraulic cable cutters have been manufactured in accordance with our Quality Standards ISO 9001.

In order to prevent any personal injury or material damage, the operator should be fully trained in the working operation and apply the relevant safety actions before using these hydraulic cutters.

The cable cutters operate at approximately 100 bar.

There is a shoulder strap for ease of use.

For safety reasons the cutting jaws will not operate unless the two levers (front and back) are applied.

Supplied with two hoses with 3/8 BSP self sealing couplings.

Weight 8.5 Kg.

This product is used by the telecoms industry.
